- Apollo-server-integration-testing
- Postman

DevOps Tools and Technologies

- Git
- TravisCI
- CircleCI
- Docker

Work history

Associate Software Engineer - Full-time (2019-04-01 - 2020-04-01)
Andela Rwanda Limited, Kigali, Rwanda.

- At Andela, I worked as a Javascript full-stack developer for both web and mobile applications.
- I worked in teams that used the agile methodology as our software management process to develop tools that were used internally and in projects for learning purposes.
- I also contributed to the recruitment of fellow Andelans by conducting interviews and mentoring aspiring Andelans throughout their Bootcamp phase prior to joining Andela.

Education

Bachelor of Science in Information and Technology (2020-02 - Today)
Mount Kenya University - Kigali, Rwanda
